

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH

Faculty of Science and Technology

Assignment Cover Page

Assignment Title:	Assignment on Selenium		
Assignment No:	01 (Final)	Date of Submission:	6 August 2021
Course Title:	Software Quality and Testing		
Course Code:	00397	Section:	C
Semester:	Summer	2020-21	Course Teacher: Abhijit Bhowmik

Declaration and Statement of Authorship:

1. I/we hold a copy of this Assignment/Case-Study, which can be produced if the original is lost/damaged.
2. This Assignment/Case-Study is my/our original work and no part of it has been copied from any other student's work or from any other source except where due acknowledgement is made.
3. No part of this Assignment/Case-Study has been written for me/us by any other person except where such collaboration has been authorized by the concerned teacher and is clearly acknowledged in the assignment.
4. I/we have not previously submitted or currently submitting this work for any other course/unit.
5. This work may be reproduced, communicated, compared and archived for the purpose of detecting plagiarism.
6. I/we give permission for a copy of my/our marked work to be retained by the faculty for review and comparison, including review by external examiners.
7. I/we understand that Plagiarism is the presentation of the work, idea or creation of another person as though it is your own. It is a form of cheating and is a very serious academic offence that may lead to expulsion from the University. Plagiarized material can be drawn from, and presented in, written, graphic and visual form, including electronic data, and oral presentations. Plagiarism occurs when the origin of them material used is not appropriately cited.
8. I/we also understand that enabling plagiarism is the act of assisting or allowing another person to plagiarize or to copy my/our work.

* Student(s) must complete all details except the faculty use part.

** Please submit all assignments to your course teacher or the office of the concerned teacher.

FACULTY COMMENTS	Marks Obtained	

	Total Marks	

1. Put all screenshots of your computer during installing Selenium.

Install selenium in desktop:

Step 1: Download all necessary files

	chromedriver_win32.zip × https://chromedriver.storage.googleapis.com/92.0.4515.107/chro... Show in folder
	IEDriverServer_x64_3.150.2.zip × https://selenium-release.storage.googleapis.com/3.150/IEDriverSer... Show in folder
	selenium-java-3.141.59.zip × https://selenium-release.storage.googleapis.com/3.141/selenium-j... Show in folder
	eclipse-inst-jre-win64.exe × https://ftp.jaist.ac.jp/pub/eclipse/oomph/epp/2021-06/R/eclipse-in... Show in folder
	jdk-16.0.2_windows-x64_bin.exe × https://download.oracle.com/otn-pub/java/jdk/16.0.2+7/d4a915d8... Show in folder

Step 2: Install JDK and setup environment variables

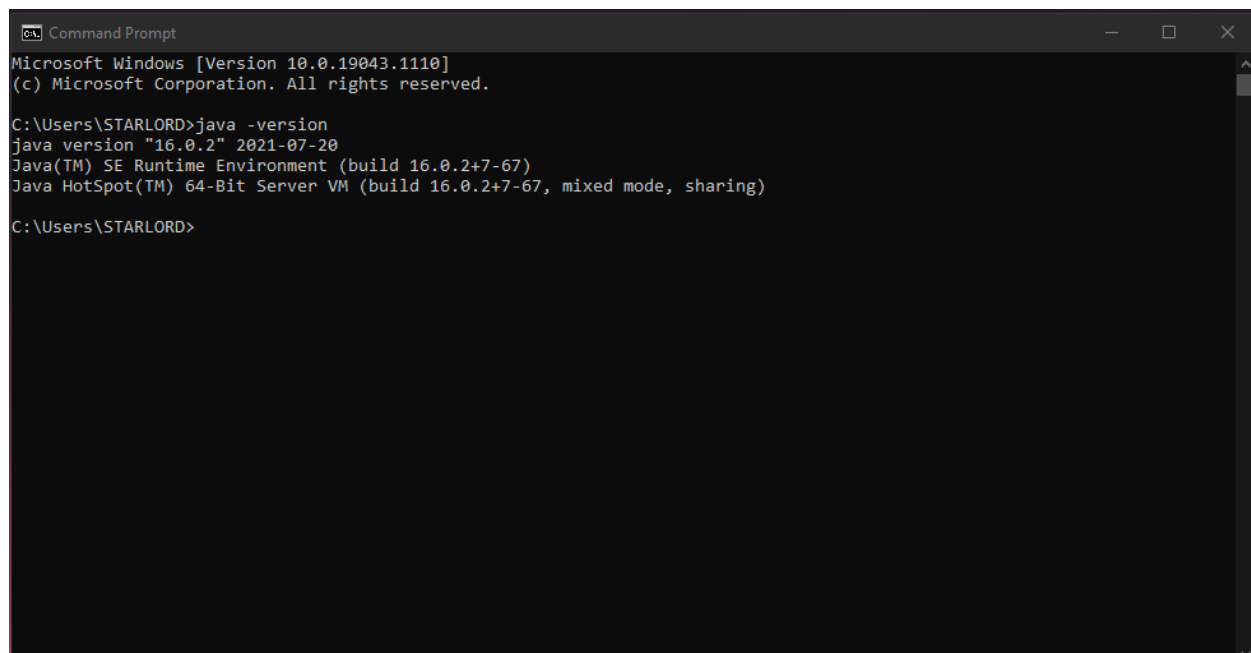

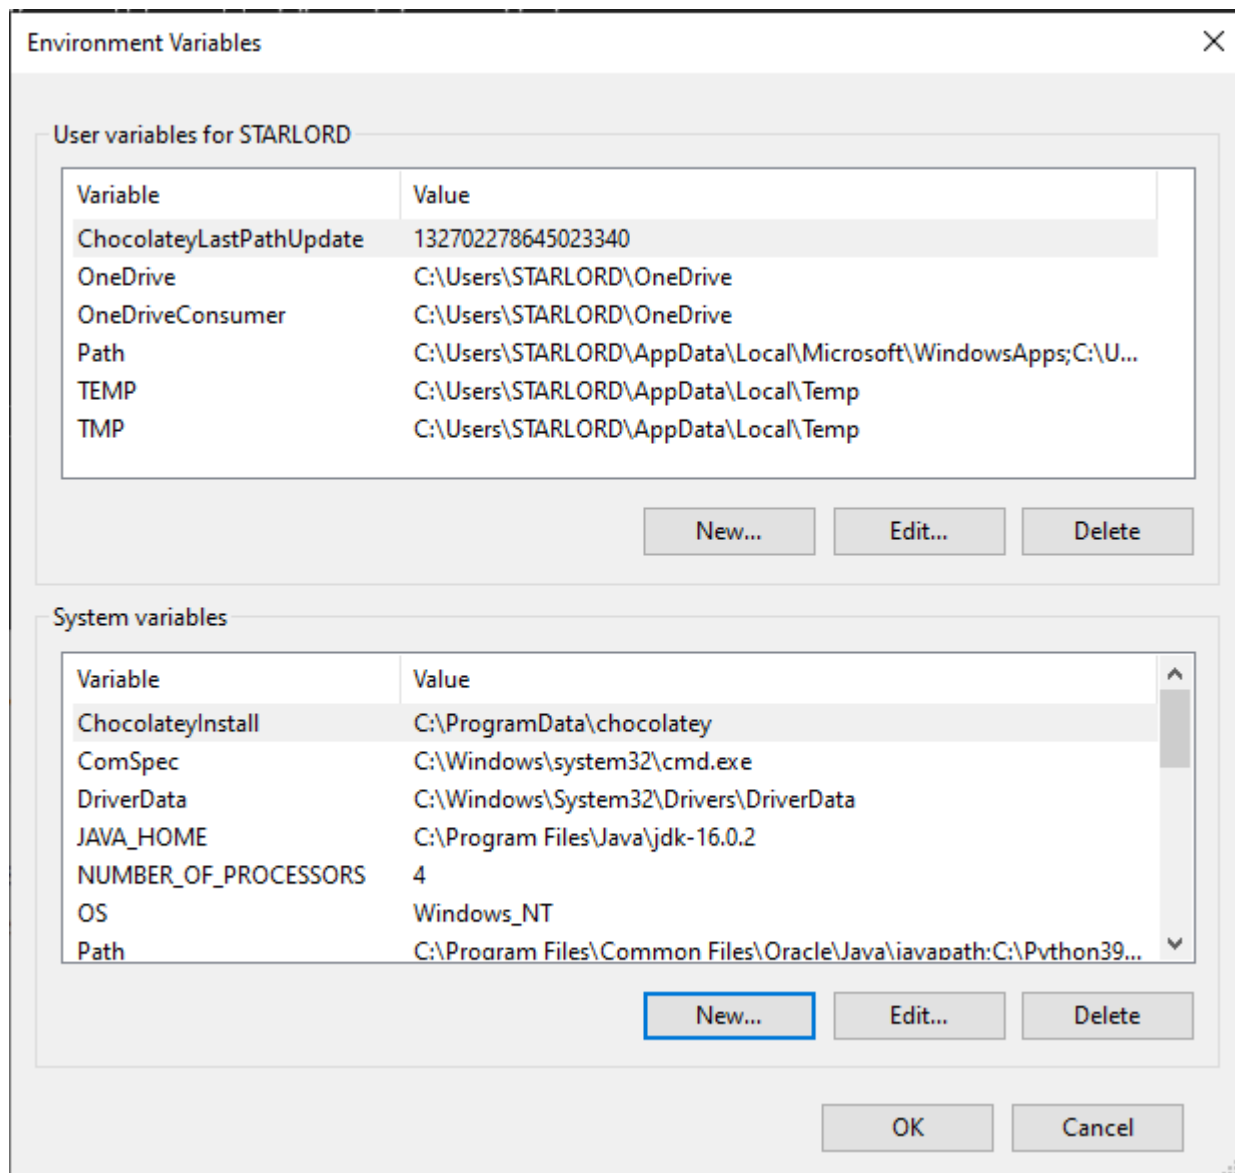

Java(TM) SE Development Kit 16.0.2 (64-bit) Successfully Installed

Click Next Steps to access tutorials, API documentation, developer guides, release notes and more to help you get started with the JDK.

Next Steps

Close

Step 3: Install and set everything up in eclipse

Eclipse IDE for Java Developers

The essential tools for any Java developer, including a Java IDE, a Git client, XML Editor, Maven and Gradle integration.

Install Selenium as a Browser extension (An alternative approach):

For Mozilla Firefox browsers:

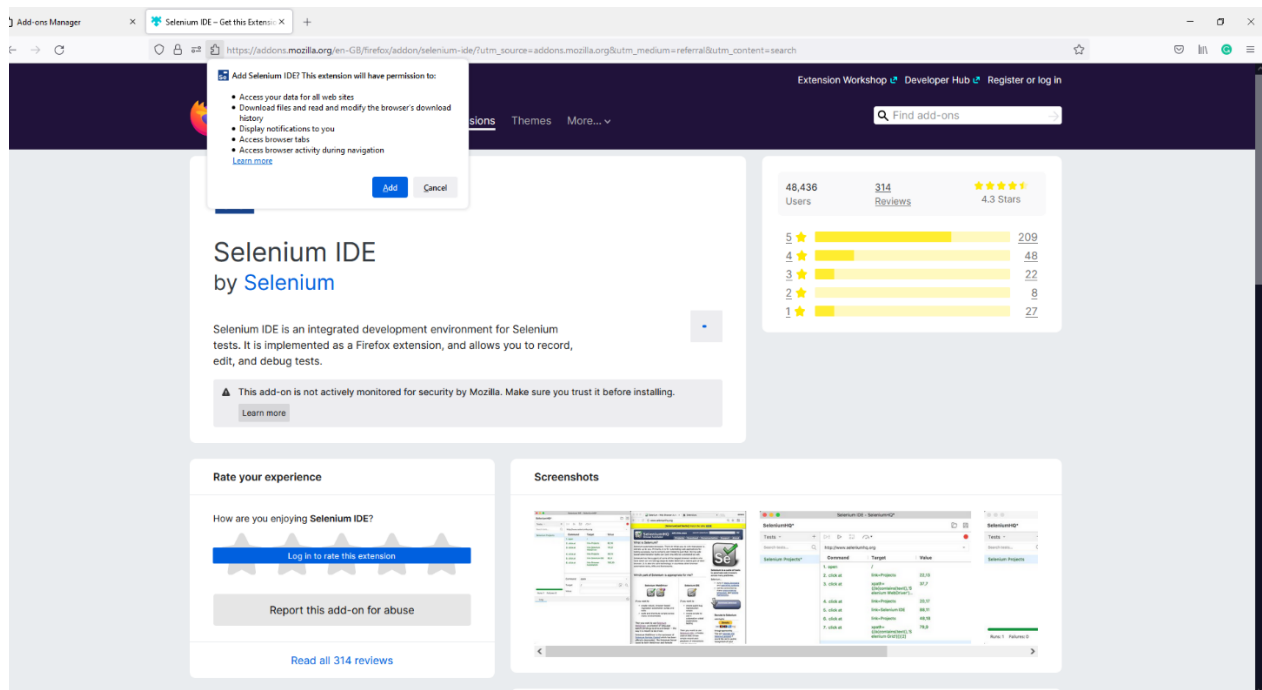

Figure 1: go to Extensions and search selenium IDE

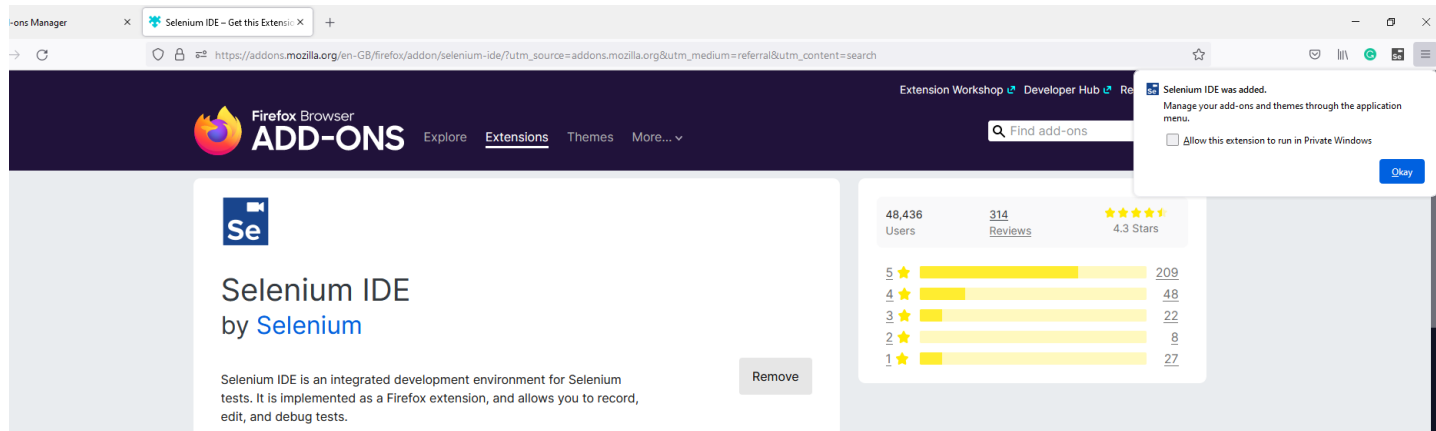

Figure 2: ADD ON FIREFOX BROWSER

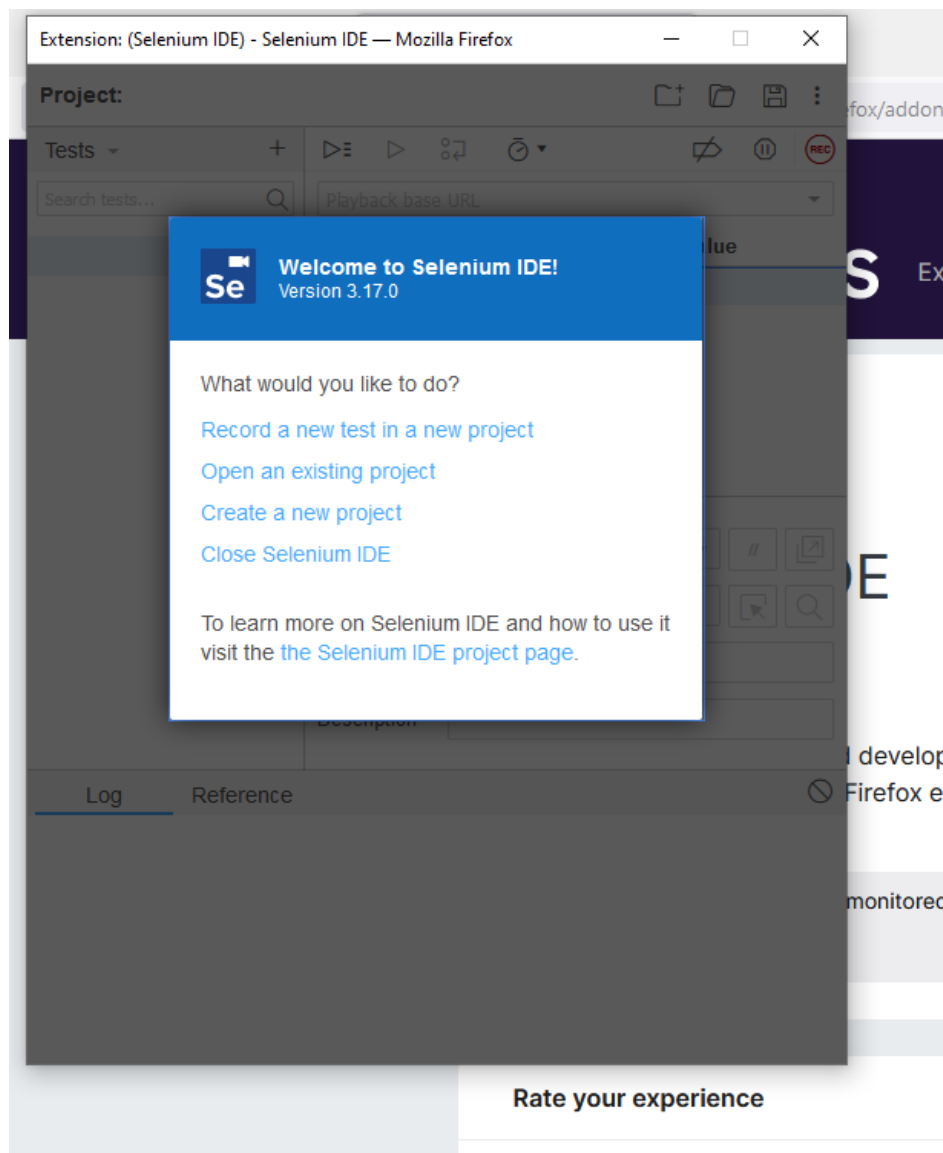

Figure 3: NOW IT WILL AUTO GENERATE TO BROWSER

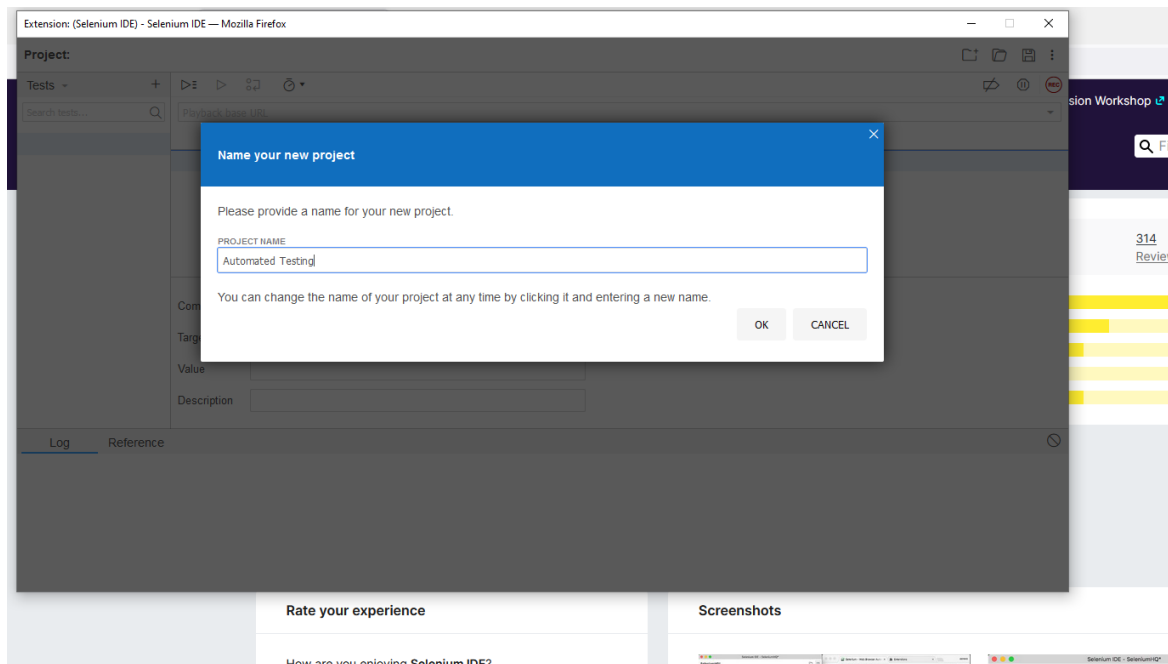

Figure 4

Figure 5: Work process

2. Describe the benefit of automated testing and specialty of Selenium.

Answer:

There are two types of software testing process.

A. Manuel Testing:

Manual software testing is performed by a person who carefully looks at the screen of an application sitting in front of a computer, tries different combinations of uses and inputs, compares the results to expected behavior, and records what is observed. To do.

B. Automated Testing:

For software testing, test automation is the use of software that is separate from the software being tested to control the execution of the test and the comparison of actual and predicted results.

Now we are going describe the benefits of automated testing:

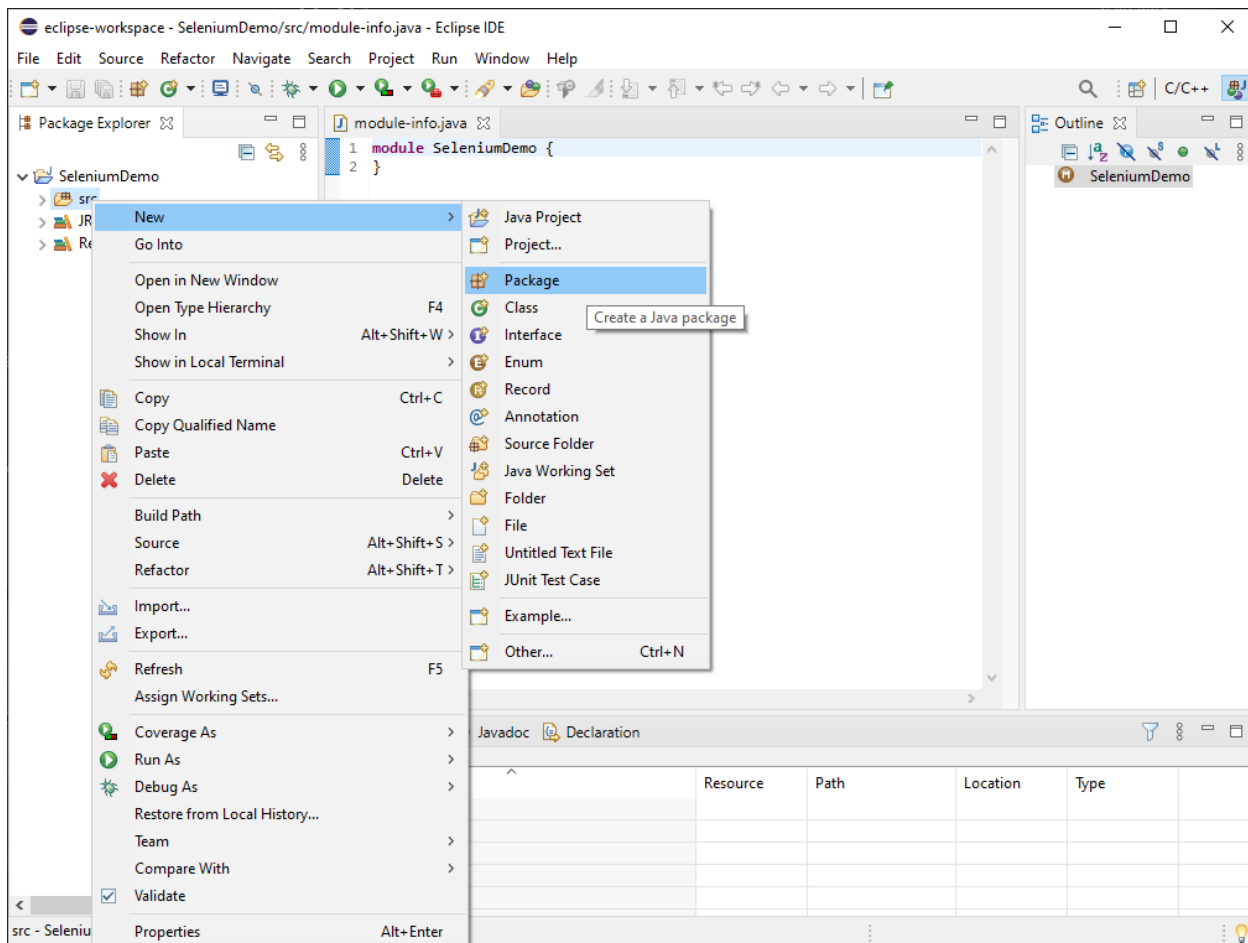

- a. It saves more time than Manuel testing because the test is executed by the system.
- b. It is also cost efficient because it needs a system to run.
- c. Even the most conscientious testers make mistakes during monotonous manual testing. Automated tests do exactly the same procedure each time they are performed and don't forget to record detailed results
- d. By implementing an automated testing strategy, you allow your QA team to spend time on tasks other than manual testing.

Selenium:

Selenium is an open-source tool that automates web browsers. It provides a single interface that allows us to write test scripts in programming languages such as Ruby, Java, NodeJS, PHP, Perl, Python, and C #. Selenium is a test automation framework that allows us to automate web app testing. The Selenium test tool is used to automate cross-browser testing of web applications. Selenium is an open-source tool. And Selenium is released regularly. Testers use Selenium. This is because you can easily generate test scripts to verify functionality.

3. Practice a dummy project testing in Selenium and put all screenshots from your computer during practicing it.

The all practicing picture: (For first process: Using selenium in Eclipse IDE using JAVA):

Java Package

Create a new Java package.

Creates folders corresponding to packages.

Source folder:

SeleniumDemo/src

Browse...

Name:

seleniumDemo

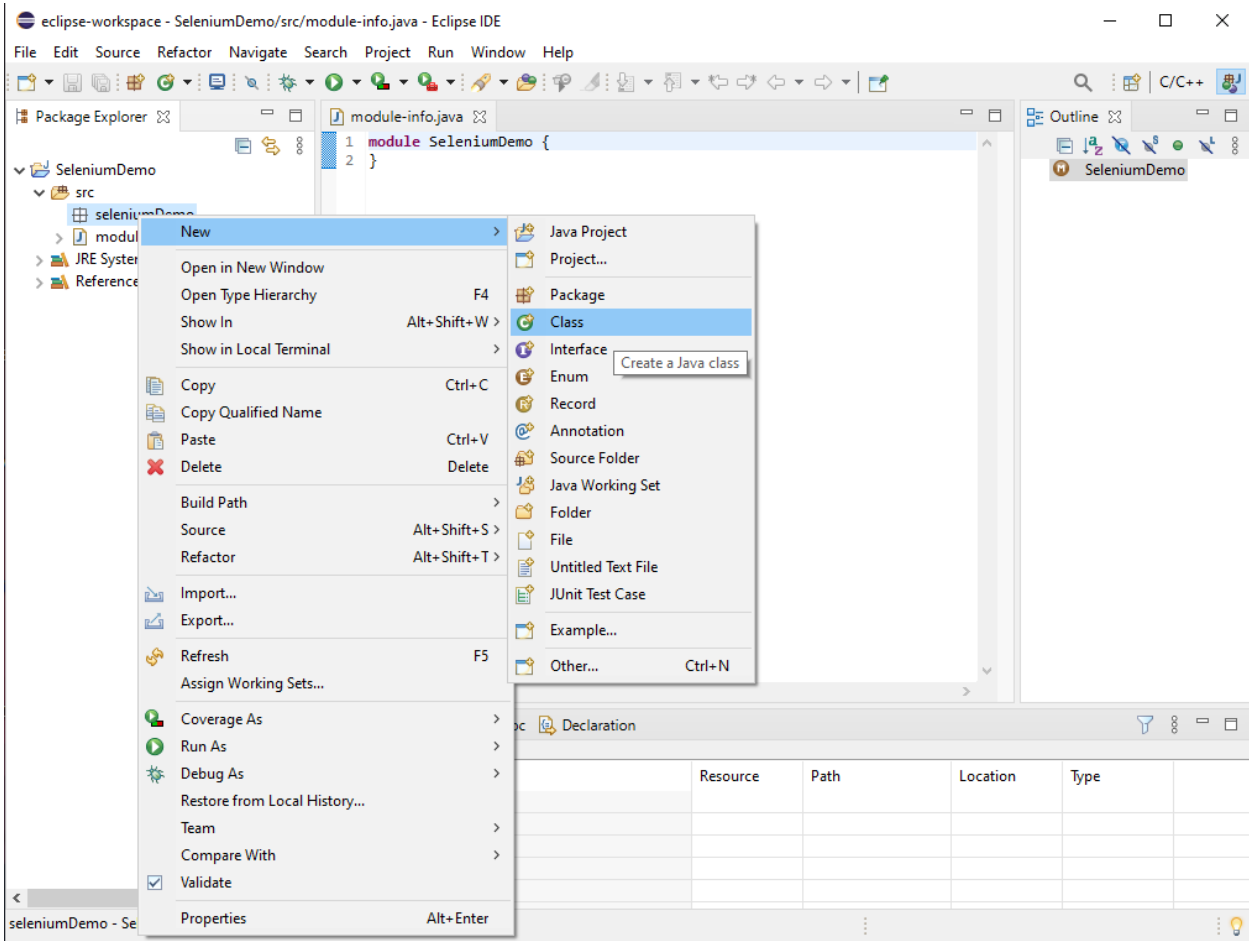

☐ Create package-info.java

☐ Generate comments (configure templates and default value [here](#))

Finish

Cancel

Java Class

Create a new Java class.

Source folder:

Package:

☐ Enclosing type:

Name:

Modifiers: ☒ public ☐ package ☐ private ☐ protected
☐ abstract ☐ final ☐ static

Superclass:

Interfaces:

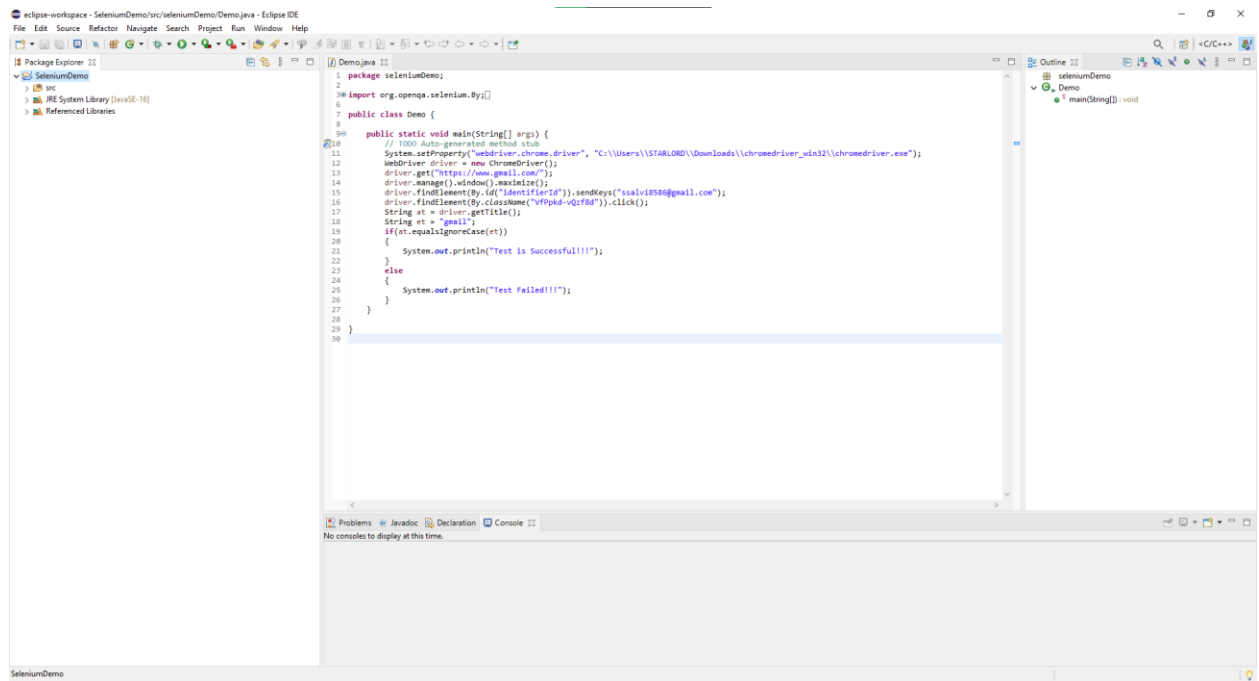

Which method stubs would you like to create?

- ☒ public static void main(String[] args)
☐ Constructors from superclass
☒ Inherited abstract methods

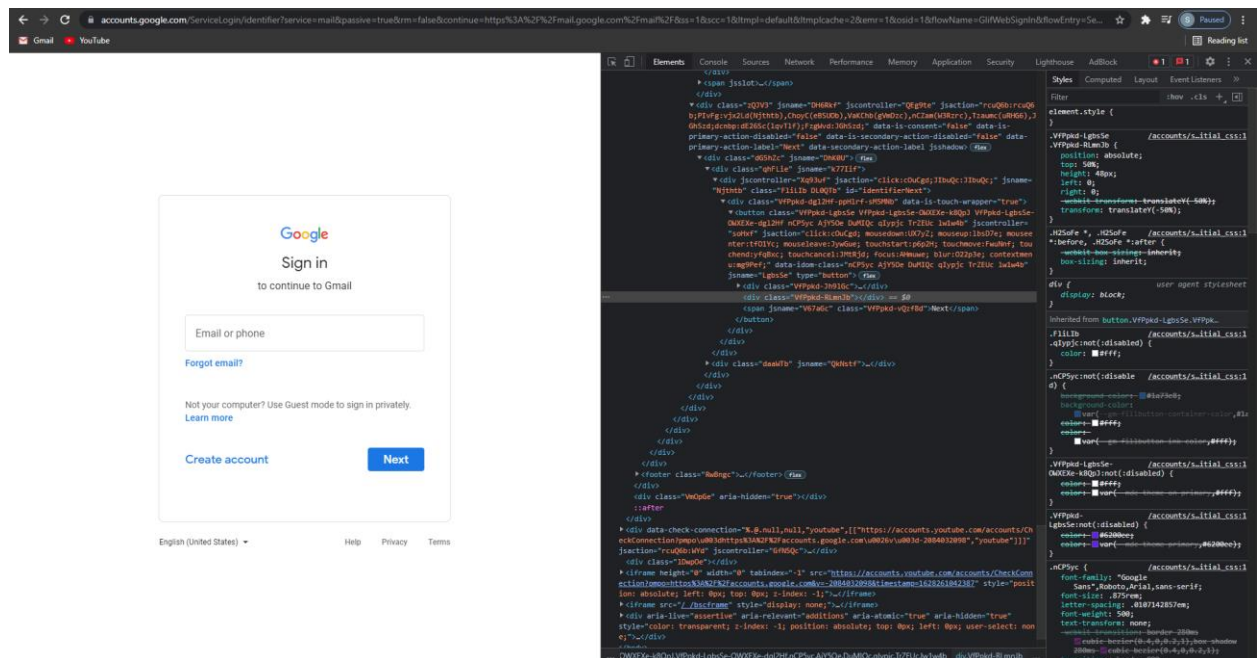

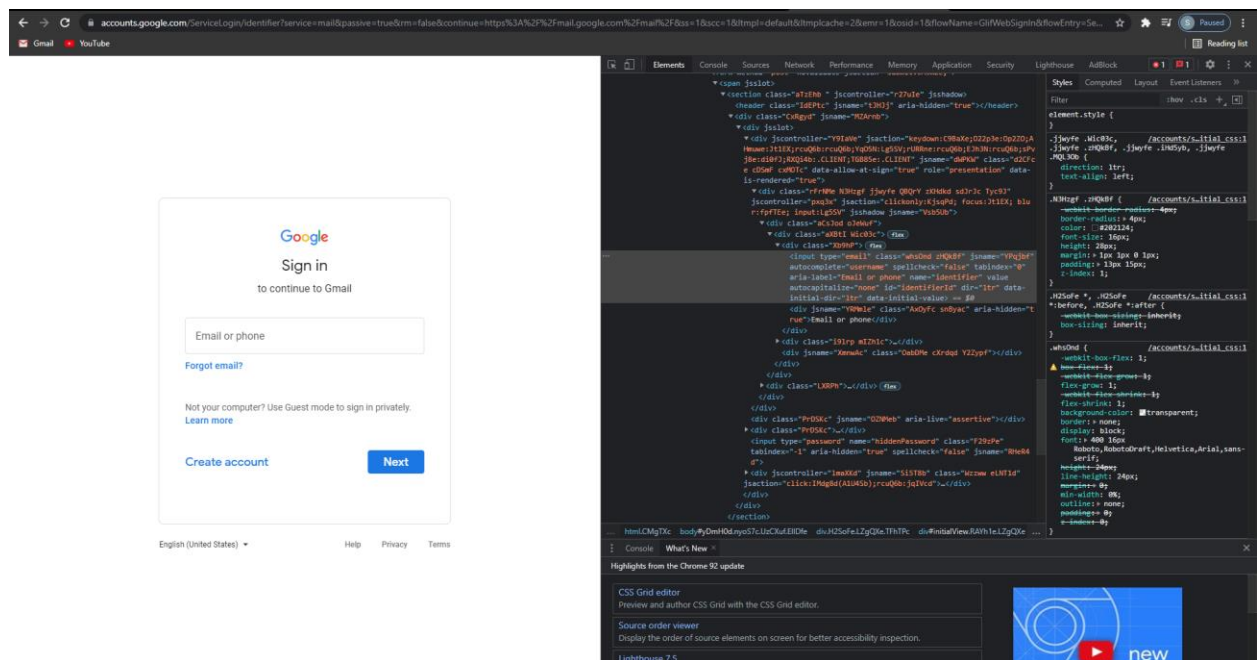

Do you want to add comments? (Configure templates and default value [here](#))

- ☐ Generate comments

```
1 package seleniumDemo;
2
3 import org.openqa.selenium.By;
4
5
6 public class Demo {
7
8     public static void main(String[] args) {
9         // TODO Auto-generated method stub
10         System.setProperty("webdriver.chrome.driver", "C:\\Users\\STARLORD\\Downloads\\chromedriver_win32\\chromedriver.exe");
11         WebDriver driver = new ChromeDriver();
12         driver.get("https://www.gmail.com/");
13         driver.manage().window().maximize();
14         driver.findElement(By.id("identifierId")).sendKeys("ssalvi8586@gmail.com");
15         driver.findElement(By.className("VfPpkd-vQzf8d")).click();
16         String at = driver.getTitle();
17         String et = "gmail";
18         if(at.equalsIgnoreCase(et))
19         {
20             System.out.println("Test is Successful!!!");
21         }
22         else
23         {
24             System.out.println("Test Failed!!!");
25         }
26     }
27 }
28
29
30
```
